

HORSE TRAILERS

Combining advanced technology with the finest of materials, the **Nugent Spirit Horse Trailer** is aesthetically impressive, but more importantly, it is built to last, setting it apart from any other horse trailer on the market. With full type approval (ECWVTA) any horse owner will appreciate the exceptional attention to detail. The retractable folding jockey wheel takes the inconvenience out of unhitching. The curved front increases the space inside the trailer with the spare wheel stored neatly on the front drawbar. The Nugent trailer uses parabolic leaf spring suspension which provides better shock absorption as well as helping to distribute weight evenly over the axles, giving excellent towing characteristics.

A tubular stainless steel roof frame coupled with bespoke aluminium vertical extrusions and the fully galvanised chassis provides exceptional strength and stability. Ventilation is provided by two multidirectional air vents and a roof top ventilator inside the trailer, ensuring maximum air flow, all of which can be opened or closed as required. The extruded aluminium floor planking is covered with a removable cobbled finish rubber matt with excellent wear and grip properties. The removable centre partitions have been developed using composite board, which provides flexibility and durability.

Multiple breast bar positions at two heights, coupled with the safety release system on the outside means that horses can travel in safety and comfort. Available with a maximum gross weight of 2700kg, the standard design includes plenty of desirable features.

Standard Features

- Parabolic Leaf Springs
- Galvanised Steel Chassis
- Semi Automatic Hitch with Retractable Jockey Wheel
- Centre Divider Partitions with Multiple Breast Bar Positions
