

## YARD SCRAPERS

Nugent Engineering offers two different models in the yard scraper range which are both ideal for the cleaning of smooth surfaces in farm buildings and yards resulting in improved hygiene and less slippery underfoot conditions.

The **Adjustable Nugent Yard Scraper** has a heavy duty frame with a reversible fibre based rubber which is 50mm thick. The adjustable yard scraper is easily adjusted from 6' to 8' allowing for a very versatile product. It is available in both galvanised or painted finishes.

The **Nugent Standard Yard Scraper** is 6' long with a 25mm thick rubber. The standard yard scraper has a simple flip over mechanism and comes in both galvanised or painted finishes.

## YARD SCRAPERS

Reinforced Fibre Based Rubber for extra strength.

Robust spring loaded trip mechanism.

Durable construction designed to last.
