

QUALITY ENGINEER

Excellent opportunity for a Quality Engineer to join our team on a full-time, permanent basis, assuring products meet high quality standards for our customers and working closely with production to continuously improve quality standards within the factory.

JOB FUNCTION

The Quality Engineer will be responsible for:

- Developing quality standards and procedures to deliver consistency across all areas of the business
- Identifying best practice both internally and externally
- Promoting a 'Right First Time' ethos at all levels
- Developing and promoting continuous improvement activities, carrying out root cause identification to ensure viable solutions are implemented
- Ensuring compliance with ISO practices at all levels throughout the business
- Completing Pre-Delivery Inspections and sign-offs for dispatch
- Developing and completing periodic audits
- Maintaining a work area in accordance with established housekeeping procedures to ensure a safe and clean work environment

EXPERIENCE

- Industry experience would be advantageous

ESSENTIAL CRITERIA

- Excellent IT skills, particularly in Microsoft Office (Excel and Outlook)
- Strong eye for detail
- Good communication skills
- Ability to demonstrate initiative
- Planning and organisational skillset
- Team player who is creative, open-minded, methodical & passionate about the role
- Excellent analytical and problem-solving skills
